

# Porsche Taycan Turbo

## Technical specifications

**460 kW (625 PS)**  
Power

**500 kW (680 PS)**  
Overboost power

**850 Nm**  
Maximum torque

**260 km/h**  
Top speed

**2,305 kg**  
Unladen weight according to DIN

**270 kW**  
Maximum charging power

**26.0 kWh/100 km**  
Combined electricity consumption

**0 g/km**  
CO<sub>2</sub> emissions

### Acceleration

0 – 60 mph	<b>3.0 s</b>
0 – 100 km/h	<b>3.2 s</b>
0 – 160 km/h	<b>6.9 s</b>
0 – 200 km/h	<b>10.6 s</b>

### Range WLTP

**381 – 450 km**

## Dimensions

Height: 1,381 mm

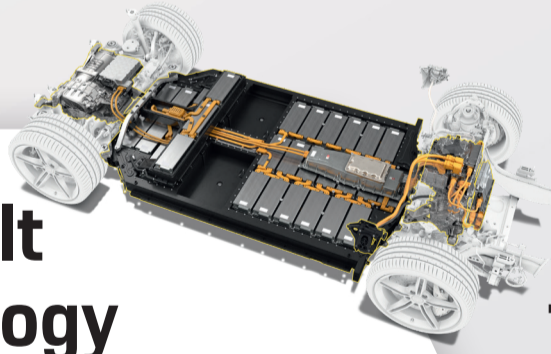

Wheelbase: 2,900 mm  
Length: 4,963 mm

Track Width front: 1,702 mm  
Track Width rear: 1,667 mm

## Highlights

**800-volt technology**

ensures a high continuous power, reduces the charging time significantly and decreases the weight.

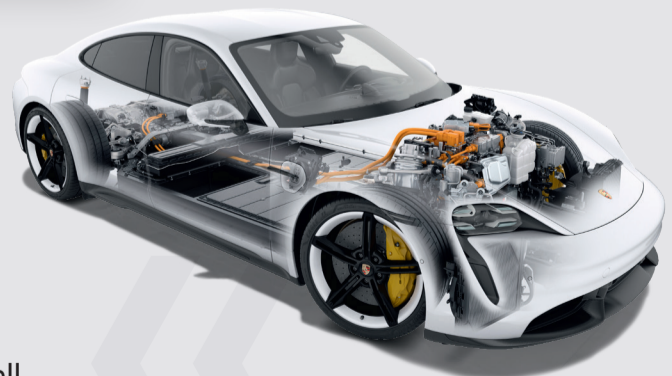

**Two-speed transmission**

enables fast acceleration as well as a high end speed.

**Two permanently excited synchronous machines**

for highest power density and efficiency as well as maximum reproducibility of driving performance.

**C<sub>d</sub>: from 0.22**

optimizes energy consumption and thus leads to a high range.
